BUILT TO LAST

SteelCore® Corrugated Bolted Steel Tanks are designed to meet IBC/ UBC requirements utilizing ASCE structural codes for water storage tanks. Extended lifespan, lower costs and long warranties make SteelCore® tanks a great choice.

Built one at a time & Engineered on of a kind!

COST EFFECTIVE

SCT tanks are designed to the same structural standards as other Bolted Steel Tanks. The materials are more cost effective and labor and equipment to build is significantly less. You may save up to 30% when choosing SteelCore® Corrugated Bolted Steel tanks over other options.

LONG WARRANTIES- WHY?

Up to 20 year warranties on all SteelCore® Corrugated Bolted Steel tanks installed by manufacture certified tank erection teams. Based on application and location. Interior membrane liner systems are designed to fit the interior of your tank, creating a critical barrier between water and steel. Elongating the life-span of the tank. Designed for easy repair, inexpensive and simple replacement

CUSTOMIZABLE

SCT tank models can be built up to 2.9 million gallons. Starting at 6'D & up to 192'D. With both 10° and 30° standard G140 Hot Dip Galvanized roof designs, Aluminum Geodesic Dome Roofs and floating covers available. Customizable wall heights and roof styles, nozzles, fittings and appurtenances for your project.

MADE IN THE USA

SteelCore® Corrugated Bolted Tanks are manufactured in the US and are fabricated from US steel. Corrugated Bolted Steel Tanks are the next generation of innovative design options and highly cost effective water storage design.
