

ABOUT US

National Storage Tank is an Authorized Dealer of SteelCore® Tanks, (SCT) manufactures Corrugated Bolted Steel Tanks and water products for potable water and other water storage applications. Fire Protection, irrigation, waste water and more.

Potable Water Storage Tanks

SteelCore® Corrugated Bolted Steel Tanks are designed to meet the current AWWA requirements utilizing ASCE structural codes for water storage tanks. Extended lifespan, lower costs and long warranties make SteelCore® tanks a great choice.

Contact Authorized Dealer National Storage Tank for information.

US Made Products

SteelCore® tanks and products are manufactured in the US and are made of US steel, Corrugated Bolted Steel Tanks are the next generation of innovative design options and highly cost effective water storage design for public and private water storage applications. SCT tanks -G115 Hot Dip Galvanized wall panels and G140 Hot Dip Galvanized Roof.

OUR SERVICES

SCT supplies engineered submittal, site specific foundation designs, on site installations by factory certified and licensed installation teams, and turn key services. Unique design options available.

Tanks up to 2.9 million gallons

SCT tank models can be built up to 2.9 million gallons. Starting at 6'D & up to 192'D. With both 10° and 30° standard G140 Hot Dip Galvanized roof designs, Aluminum Geodesic Dome Roofs and floating covers available.

NSF-61 Drinking Water Standards

NSF-61 certified liners and coatings are used to safely store potable water in SteelCore® Corrugated Bolted Steel Tanks. Liners also provide a barrier to keep water from constant contact with the steel walls. Offering a second layer of protection

1

Cost Savings

SCT tanks are designed to the same structural standards as Factory Coated Bolted Steel Tanks. The materials are more cost effective and labor and equipment to build is significantly less.

2

Coatings & Liners

Layers of protection: Steel: G115 & G140 Zinc Hot Dip Galv coatings. Optional: Factory Powder Coating. Liner: Up to 60 mil Flexible membrane liner barrier to elongate lifespan of the steel structure.

3

Structural Engineering

SteelCore® Corrugated Bolted Steel Tanks are engineered site specific, for each application and location. Designed to ASCE standards for winds up to 185 MPH, Snow loads up to 75 PSF and High Seismic Conditions.

4

Long Warranties

SCT supplies up to 20 year warranties on all SteelCore® Corrugated Bolted Steel tanks installed by manufacture certified tank erection teams. Based on application. and location.

Why choose us:

- Low costs: Decrease your water storage budget up to 50% with less upfront costs and more options.
- Lead Times: Short Manufacturing lead times can be as quick as 3 weeks and expedited installation lead times.
- Long Warranties- up to 20 years . Which is 19 years longer than other steel tanks.
- Innovation: SteelCore® Corrugated Bolted Steel tanks are the next generation of innovation in potable water storage design. Sealed interior barriers up to 60 mils for extreme protection and extended life span.
